Pricing Parameters

Parameter	Description
SLA (Service Level Agreement)	The service completion time affects pricing: • Normal – Standard completion time. • Express – Faster processing and priority handling. • Super Express – Urgent task with highest priority and immediate delivery.
Accessibility	The level of accessibility to the project area influences logistics costs: • Urban – Easily accessible area. • Suburban – Moderately accessible, requires additional travel. • Rural – Hard-to-reach area, longer travel or logistics required.
Verification	Determines the level of quality assurance required: • None – No verification required. • QC Internal – Internal quality control verification. • Client Verify – Verification by the client side.
Media	The type of documentation included affects operational and post-production cost: • None – No media documentation. • Photo – Includes photo documentation. • Photo + Video – Includes both photo and video documentation.
Questionnaire	The number of questions determines field time and complexity: • ≤10 – Up to 10 questions. • 11–20 – Between 11 to 20 questions. • >20 – More than 20 questions.
Permit / Security	Indicates whether special access or permits are required: • No – No special permit required. • Yes – Special or security permit needed to conduct the task.
